

RAYYAN SENDOLAY

Aspiring AI/ML Engineer | Computer Science (IoT & Cyber Security) Undergraduate

Mumbai, Maharashtra | +91 9136608081 | rayyansendolay2405@gmail.com | github.com/rayyansendolay24

SUMMARY

Final-year Computer Science (IoT & Cyber Security) student with hands-on experience across full-stack development and applied AI/ML, including LLM-based applications and data pipelines. Currently deepening skills in AI engineering and machine learning while building a Network Intrusion Detection System (NIDS) using ML. Strong foundation in Python, data analysis, and problem-solving; looking for an internship/placement role in AI/ML or software engineering.

SKILLS

Languages: Python, C/C++, JavaScript (basic)

AI/ML & Data: Machine Learning fundamentals, TensorFlow, Data Cleaning & Analysis, LLM APIs (Groq, LLaMA 3.1), Prompt Engineering

Tools & Platforms: Git/GitHub, MS Power BI, Blockchain fundamentals, VS Code

Currently Learning: AI Engineering, Machine Learning, Network Intrusion Detection (NIDS)

Soft Skills: Communication, Attention to Detail, Team Collaboration, Fast Learner

PROJECTS

AI-Based Network Intrusion Detection System (NIDS)

In Progress

- Building an ML-based system to detect network intrusions and anomalous traffic patterns in real time.
- Exploring feature engineering on network traffic datasets and evaluating classification models for intrusion detection accuracy.

AI Resume Screening System [\[GitHub\]](#)

2025

- Built an AI-powered resume screening tool in Python using a Groq-hosted LLM to parse resumes and match/rank candidates against job requirements.
- Designed the parsing and ranking pipeline to reduce manual resume shortlisting effort.

Smart AI Chatbot [\[GitHub\]](#)

2025

- Developed a Python chatbot that generates intelligent, context-aware responses using the LLaMA 3.1 model via the Groq API.
- Implemented conversation history handling to maintain context across multi-turn conversations.

Jarvis Voice Assistant [\[GitHub\]](#)

2025

- Created a Python voice assistant using speech recognition and text-to-speech to execute tasks such as opening websites, playing YouTube videos, and performing web searches.

Expense Tracker | E-Waste Data Analysis [\[GitHub\]](#)

2025

- Built a JavaScript expense-tracking web app; separately analyzed e-waste data in a Jupyter Notebook using Python to surface key trends.

EXPERIENCE

Full-Stack Developer Intern

Jun 2025 – Jul 2025

- Helped build and update web applications end-to-end, collaborating with a team to plan and ship features.
- Identified and fixed bugs, and tested features to ensure application reliability before release.

AI & Data Analytics Intern

Jun 2025 – Jul 2025

- Assisted in building and training machine learning models as part of a team-based project.
- Cleaned and prepared datasets for analysis and worked with the team to improve model/algorithm performance.

EDUCATION

M.H. Saboo Siddik College of Engineering, Mumbai

Graduating 2027

Bachelor of Engineering in Computer Science (IoT and Cyber Security including Blockchain Technology)

- Current Year: Final Year (4th) | GPA: 9.08
- Relevant Coursework: Engineering Basics, Web Development, IoT, Blockchain, Machine Learning

CERTIFICATIONS

- Leading with Impact: Team Dynamics, Strategy and Ethics
- Python for Data Analysis
- MS Power BI Training
- SkillUP Blockchain Developer Training
